

Product Brochure

Renovaplex Bio — Renewable Solvent Portfolio

Renovaplex develops renewable, high-performance chemicals produced from bio-based feedstocks using integrated chemical and biotechnological processes. Our Bio product line delivers drop-in performance with a materially lower carbon footprint than fossil equivalents.

Product Line: Renovaplex Bio

Bio Acetone	High-purity acetone from renewable feedstock. Solvent for coatings, adhesives, extraction, and g
Bio Isopropanol	Bio-based IPA (2-propanol). Cleaning, disinfection, pharmaceutical and electronics processing.

Why Renovaplex Bio

- Drop-in replacement for fossil-derived solvents — no reformulation required.
- ISCC-ready supply chain with mass-balance certification available on request.
- Batch traceability from feedstock to delivery.
- European production footprint (Switzerland & Netherlands) with reliable logistics.

Packaging & Supply

Drums	200 L HDPE / steel
IBC	1000 L stackable
Bulk	ISO tank / road tanker (min. 22 t)
Lead time	Standard 2–3 weeks ex-works EU

Documentation Available

Safety Data Sheet (SDS), Technical Data Sheet (TDS), Certificate of Analysis (CoA), Certificate of Origin, ISCC mass-balance declaration.
